NOTES:

- 1/ Based on Mid-Session Review.
- 2/ Additional CCC costs of Integrated Crop Management Program. Not included in CCC Commodity total.
- 3/ Decrease due to changes in food stamp proration. Subsequent increases are due to excluding from income the value of "welfare hotels" provided to food stamp recipients.
- 4/ Primary components include \$261 million for Rural Partnership Investment Board funding (Title I), \$91 million for REA Water and Waste Financing (Title I), \$167 million for Telecommunication Grants (Title II), \$94 million for FmHA Water and Waste Grants (Title VI), and \$48 million for the Reforestation Trust Fund (Title VII).
- 5/ Reflects impact of reduced direct lending, interest buydown, and good faith provisions.
- 6/ Subject to appropriations.
- 7/ Requires additional 6.1 million acre enrollment in CRP in the 1991-95 period in comparison to current law estimate of 3.1 million acres in 1991. Any additional enrollment is subject to appropriations.
- 8/ Includes outlays and authorizations for programs in other agencies and departments.
- 9/ Does not include authorizations for the Small Business Administration.
- 10/ Increases are due to CSFP elderly expansion, increases in the Indian commodity package and EFNEP reauthorization at new higher levels. The CSFP elderly estimates are conservative. Actual exposure could reach into the hundreds of millions of dollars as the program grows from current participation

1/ Supply management required over 78 lbs.

2/ Purchase prices per pound for butter specified in S. 2830 (\$0.983 in Calendar Year 1991, \$0.815 in CY 1992 and CY 1993, and \$0.788 in CY 1994 and CY 1995) were used in the analysis.

3/ Supply management required in FY 1992-95. USDA must prepare a report and recommendation to Congress on the supply management program to be implemented. Congress could then approve, disapprove or modify the program. Since the program is currently undefined, costs could be more or less.

ASSUMPTIONS USED IN ALTERNATIVE

Senate Bill:

- Current crit.: Enrollment of 300,000 acres per year, 1991-95. Rental rates at \$60/acre and cover costs at \$34/acre.
- Shelterbelts: Enrollment of 20,000 acres per year, 1991-95. All under permanent easement paid out over ten years at 10 percent interest. Easement costs based on \$60/acre rent. Cover costs at \$40/acre.
- Trees on past.: Enrollment of 200,000 acres per year, 1991-95. Rental rates at \$20/acre and cover costs at \$40/acre.
- Water quality: Enrollment of 300,000 acres per year, 1991-95. All under permanent easement paid out over ten years at 10 percent interest. Easement costs based on \$80/acre rent. Cover costs at \$34/acre.
- Conv. To trees: Assumes 50,000 acres of current CRP lands converted to hardwood trees with contracts extended to 15 years. No additional cost sharing would be provided. Additional rental costs would not be paid until 1996. Also assumes that 50,000 acres of current CRP lands will be converted to shelterbelts or windbreaks and contracts extended to 15 years. Cost sharing would be provided at a rate of \$65/acre. Rental rates of \$51/acre are also used.
- Wetland reserve: Enrollment of 200,000 acres per year, 1991-95. All under permanent easement paid out over ten years including interest at 10 percent. Easement costs based on \$61/acre rent. Restoration costs of \$115/acre paid out in year of enrollment.
- Farmland prot.: Assumes 11 States will participate at a level of \$10 million per State per year. Interest rates would be subsidized for the full ten years of the loan and are calculated on the basis of the difference between the allowable interest rate of 9 percent and the FmHA limited resource rate of 5 percent.
- WQ incentives: Assumes enrollment of 10 million acres which would offset CRP enrollment requirements by 1 million acres. Costs are calculated on basis of 1 million acre CRP enrollment at rental rate of \$60/acre and cover costs of \$34/acre.
- Weed control: Reflects Forest Service costs only. Based on the costs of implementing weed control programs in current Forest Service land management plans.
- Int. Crop Mgt.: Assumes no net change from President's budget in production, price, or deficiency payment rates. ARP's are reduced 5 percentage points across the board. Total cropland acreage is estimated at 25 million acres which includes 6.6 million acres of base.

FARM CREDIT

1990 Farm Bill
Farm Credit Title

Summary. Impacts of the Senate Farm Bill provisions reducing direct loan levels, increasing use of the interest buydown program, and revising restructuring authorities are estimated by the Administration to reduce outlays by about \$500 million over five years. CBO estimates the changes will reduce outlays by about \$850 million over five years.

Direct lending reductions. The interest buydown program reduces direct lending for ownership and operating loans by \$100 million in 1991, \$200 million in 1992, and \$300 million in each of the next three years.

The impact of the reductions in program level on outlays depends on repayment assumptions. Since outlays measure loan disbursements less loan repayments, loans disbursed and repaid during the five year period will have little impact on total outlays for the period.

CBO has estimated lower repayment rates than OMB, and thus estimates a greater outlay savings from the reductions in program level. CBO has estimated the reductions in direct lending would reduce outlays by about \$890 million over five years. OMB estimates the reduction in direct lending would reduce outlays by about \$530 million over five years.

Interest buydown. The interest rate buydown program provides for up to a four percentage point reduction in guaranteed interest rates if necessary for the borrower to cashflow. The bank is not required to match the government subsidy. The Senate provisions are consistent with the Administration's budget proposals to subsidize about \$400 million in guaranteed loans each year and costs are scored as shown in the 1991 budget.

Good faith provisions. The revisions in restructuring authorities would restrict benefits to borrowers who have acted in good faith. The changes are estimated to reduce outlays by about \$10 million annually.

<i>Loan disbursements</i>	-96	-195	-295	-300	-300	-95	-195	-295	-300	-300
<i>Loan repayments</i>	0	-65	-139	-218	-236	0	-16	-48	-97	-137
	-----	-----	-----	-----	-----	-----	-----	-----	-----	-----
<i>Outlay impact</i>	-96	-130	-156	-82	-64	-95	-179	-247	-203	-163
<i>Five year impact</i>					-528					-887
<i>Increase in interest buydown program</i>										
<i>Subsidized loans</i>	400	400	400	400	400	400	400	400	400	400
<i>Subsidy outlays</i>	1	12	17	22	27	1	12	17	27	30
<i>Five year impact</i>					79					87
<i>Good faith provisions</i>										
<i>Outlay impact</i>	-10	-10	-10	-10	-10	-10	-10	-10	-10	-10
<i>Five year impact</i>					-50					-50
<i>Total outlay impact</i>	-105	-128	-149	-70	-47	-104	-177	-240	-186	-143
<i>Five year impact</i>					-499					-850

Note: Alternative assumptions correspond to CBO estimates for loan reductions, based on assumptions of seven year repayment on operating loans. The Administration estimates assume most operating loans are annual loans. CBO estimates and Administration estimates for the interest buydown program are consistent with the 1991 budget proposal for subsidizing guaranteed lending.

FORESTRY

There are no sections 1566 - 1570.			
1571 Talladega National Forest Expansion	0.0	0.0	0.0
1581 - 1588 America the Beautiful			
a. Foundation Grant	0.0	35.0	25.0
b. Rural Tree Planting (Sec 1514)	0.0	(110.0)	(100.0)
c. Community Tree Planting	0.0	30.0	30.0
Total	94.0	239.9	389.2

Amount above current services: $389.2 - 94.0 = 295.2$ for 1991 and 293.2 for 1992 - 1995. The 1992 - 1995 estimate reflects the fact that Sec. 1525 authorizes a one-time grant of \$2 million for a Southern Forest Regeneration Center.

Amount above budget: $393.2 - 239.9 = 153.3$

Estimates are not sufficiently precise to warrant adjustments in future years, except to reflect the one-time nature of the grant to establish a Southern Forest Regeneration Center in Sec. 1525. Other costs are straight lined. It is assumed that the one time grant of 25.0 to the private tree planting foundation in Sec. 1584 will be made in 1991 and that the Community Tree Planting Program established in Sec. 1526, without an appropriation authorization limitation, will be increased by the same amount in 1992 - 1995.
